

# Promote Laboratory Sustainability

## Recycling & Waste Reduction

Opt for electronic versions when possible

Reuse packing materials or return them to vendors. Some vendors accept packing materials for reuse!

Reuse your water bottle and coffee mug

Packing peanuts can be returned to UW Recycling for reuse and recycle e-media at the nearest e-media bin

Sort your trash. Make sure that recyclable and compostable materials are not being thrown away.

Utilize plant materials when possible! Use a compost bin to divert food scraps and other compostables from landfills

Use clearly marked bins to avoid confusion!

Install faucet aerators or water misers to reduce water flow from faucets and post a schedule to consolidate autoclave loads.

Request bins or ask questions about how to recycle specific materials.
